

YOUR SMALL BUSINESS CAN SAVE BIG.

Get PSO rebates up to 70% on energy-saving upgrades.

Get an edge on the competition with PSO's small business energy solutions. Designed for customers with low usage, these services will help you:

- 1/ Reduce overhead
- 2/ Increase employee productivity
- 3/ Improve the customer experience

Rebates are currently available on:

- Commercial lighting and refrigeration
- Qualifying projects identified by your small business energy consultant

Who qualifies?

Participating businesses must use 220,000 kWh or less annually. To see if you qualify, check your PSO account at PowerForwardWithPSO.com. If you don't have an account, you can sign up for free.

What are the benefits?

- Rapid return on investment
- Free on-site analysis of your energy use
- Simple, inexpensive options for managing energy costs
- Rebates up to 70% for most lighting and refrigeration control upgrades
- A qualified small business energy consultant to simplify the process

How do I get started?

Your small business energy consultant will assess your equipment, then explain opportunities for saving energy. Together, you'll develop an action plan, and your consultant will walk you through the process. When the work is done, you pay 30% of the project costs, and PSO pays the remaining 70% directly to your small business energy consultant.

PSO Qualified Consultants. They're at your service.

PSO partners with local small business energy consultants to assist businesses with making energy-saving upgrades. These specialists help you take advantage of PSO's rebates and incentives. Schedule a consultation today and see how your local consultant can help your small business save big.
